Notes:

- (1) The unrealized net carried interest is calculated by subtracting our carried interest to management team and other parties from our unrealized income from carried interest as follows.

	For the six months ended	
	June 30,	
	2021	2020
	RMB'000	RMB'000
Unrealized income from carried interest	1,198,249	808,574
Carried interest to management team and other parties	(912,256)	(624,481)
Unrealized net carried interest	285,993	184,093

The unrealized income from carried interest is based on the underlying fair value change of the respective funds under our investment management business. The unrealized income from carried interest is allocated to us based on the cumulative fund performance to date, subject to the achievement of minimum return levels to limited partners. At the end of each reporting period, we calculate the unrealized income from carried interest that would be due to us for each fund, pursuant to the relevant fund agreements, as if the fair value of the underlying investments were realized as of such date, irrespective of whether such amounts have been realized. As the fair value of underlying investments varies among reporting periods, it is necessary to make adjustments to amounts presented as unrealized income from carried interest. Such adjustments may, in certain circumstances, reverse the unrealized income from carried interest reported in the prior period due to fluctuations in the value of the underlying investments.

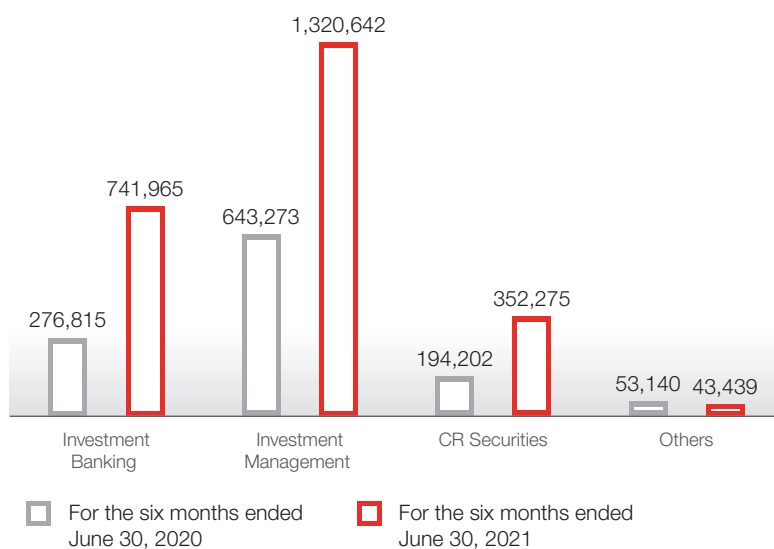

- (2) We define adjusted net profit attributable to owners of the Company as profit or loss for the period attributable to owners of the Company adjusted for the impact of (i) share-based payment expenses, (ii) change in fair value of call option, (iii) unrealized income from carried interest, and (iv) carried interest to management team and other parties.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

Despite the ongoing challenges arising from the COVID-19 pandemic, international relations, and the capital markets, China Renaissance recorded its best first-half performance in 2021. For the first half of 2021, China Renaissance's total revenue and net investment gains was RMB2.5 billion, representing an increase of 110.6% from the corresponding period in 2020. The net profit for the first half of 2021 was RMB1.3 billion, exceeding our full-year net profit in 2020. In the first half of 2021, our annualized ROE was a record high of 38.4%, compared to 18.8% of the full-year ROE in 2020. China Renaissance's strong interim results affirmed our increasing profitability with the considerable investment returns driven by our Investment Management business. Meanwhile, our Investment Banking business has generated strong synergies with our Investment Management business, demonstrating the effectiveness of China Renaissance's twin-engine business model. We strive to search for and partner with the greatest companies of the future. We seek to create values and consequently participate in their value creation. This is our long-term mission.

Our Investment Management segment recorded solid revenue and net investment gains in the first half of 2021, accounting for 54% of total revenue and net investment gains during this period, with a more-than RMB61.7 billion total AUM. The performance of our private equity funds remained strong, with net investment gains reaching RMB1.1 billion in the first half of 2021, exceeding the RMB930 million recorded for the full year in 2020. The strong investment performance of our funds continued to contribute to our overall profit and a more balanced and diversified revenue structure. In the first half of 2021, our funds invested in sectors including healthcare, consumer, technological and industrial upgrading. At the same time, a number of portfolio companies successfully entered the secondary market, which created further exit opportunities for our funds. During this period, nearly 40% of investment gains were realized from our funds. As we accelerate the pace of exit from the secondary market, we expect to generate more investment income and carried interest income in the future. We have also made significant progress in fundraising for Huaxing Growth Capital RMB Fund IV and USD Fund IV, which were launched at the beginning of this year, and expected to achieve first close in the near term.

In the second half of 2020, China's private and secondary markets had gradually displayed signs of recovery as the country worked on containing the spread of COVID-19 pandemic. Particularly, the fundraising scale of the Hong Kong capital market has reached a new record high over the past decade as enhancing fundraising activities of Chinese companies' secondary listings. Over the past years, we have invested significant resources to establish our market-leading position across Mainland China, Hong Kong and the U.S., including obtaining the necessary operating licenses and recruiting top talents, to play the lead roles in a growing number of major IPO projects. In the first half of 2021, our equity underwriting revenue reached RMB320 million, which is a record high as proven by the strong underwriting capacity and continuous growing market share and ranking. In the first half of 2021, China Renaissance was ranked:

- 6th in the "List of Hong Kong IPO Underwriting" and 3rd among Chinese financial institutions;
- 2nd among Chinese financial institutions in the "List of U.S. IPO Underwriting"; and
- 16th in the "List of Hong Kong Stock Sales and Trading Business" and 3rd among Chinese financial institutions.

BUSINESS REVIEW (CONTINUED)

At the same time, we have maintained a leading position in the private placement business. Not only have we been able to retain a high market share across the healthcare, enterprise service, consumer sectors, but we also achieved steady progress in the Hard & Core technology sector, which continuously strengthened our leading brand and prominent reputation.

Our Investment Banking businesses have been increasingly integrated with CR Securities, the linchpin of our domestic operations. During the first half of 2021, CR Securities steadily expanded its investment banking business and participated as a sponsor or an underwriter in a number of IPOs currently, which is expected to drive China Renaissance's future revenue growth. In November 2020, CR Securities obtained its principal investment and financial product distribution licenses, which in turn contributed to a 56% year-on-year growth in investment gains from principal investment in the first half of 2021. The continued improvement of investment banking and principal investment enabled CR Securities' turnaround from loss to profit in the first half of 2021.

Wealth management business development stayed on track for the first half of 2021, with an AUM of about RMB7.0 billion as of June 2021. It has continued to gain traction amongst new economy clients, and is well poised to attain synergies with our investment banking and investment management businesses. We are confident that wealth management over time will equip us with the third engine for future growth.

During the first half of 2021, we obtained net investment gains of RMB1.4 billion, driven by the continuously optimizing capital allocation to achieve a higher return on assets. The investment gains contributed to higher profitability, which reflects synergies with our business operations and contributes to business growth. Meanwhile, we have been actively exploring additional financing channels to strengthen our balance sheet, fuel further business growth to improve ROE. In May 2021, China Renaissance successfully entered into a syndicated term loan facility agreement with a total principal amount of US\$300 million. Looking ahead, we plan to allocate more capital to our Investment Management business and facilitate investment banking business with structured financing for key account clients through the more efficient use of capital to achieve higher AUM and ROE.

This increase was primarily due to (i) an increase in equity underwriting services resulting from the increase of IPOs by new economy companies, (ii) an increase in private placement advisory fees, and (iii) an increase in sales, trading, and brokerage fees.

Interest income and net investment gains mainly come from structured finance related products. Structured financing is dedicated to exploring and developing non-equity financing services to new economy firms. For our project funds, the percentage may vary from 0% to 2%. The income from carried interest from each of our funds is determined only after the fund has achieved its applicable contractual hurdle rate and is based on a percentage of difference of fair value of investments net of expenses over invested capital, which is typically 20% for our main funds and ranges from 0% to 20% for our project funds. The hurdle rate of our funds is typically 8% per annum. Our main funds generally have investment periods of five years. The term of our main funds generally last for 7 to 12 years, subject to a limited number of extensions with the consent of the limited partners.

- (1) An investment is considered fully or partially realized when it has been disposed of or has otherwise generated disposition proceeds or current income.
- (2) The gross multiples of invested capital measure the aggregate value generated by private equity fund's investments in absolute terms. Each gross multiple of invested capital is calculated by dividing the sum of total realized and unrealized values of a private equity fund's investments by the total amount of capital invested by the private equity fund. Such total amount of capital invested by the private equity fund does not give effect to the allocation of realized and unrealized carried interest or the payment of any applicable management fees or operating expenses.
- (3) As of June 30, 2021 and December 31, 2020, we managed nine main private equity funds, including six under our Huaxing Growth Capital and three under our Huaxing Healthcare Capital.

SEGMENT PERFORMANCE (CONTINUED)

Segment Revenue and Net Investment Gains

For the investment management segment, management fees decreased by 2.3% from RMB199.5 million for the six months ended June 30, 2020 to RMB194.9 million for the six months ended June 30, 2021. This decrease was primarily due to the slower inflow of new capital commitment in the first half of 2021 as compared to the corresponding period in 2020. Net investment gains from the investment management business mainly represents the investment income from the investments in our own private equity funds and third-party private equity funds. Net investment gains increased significantly from RMB422.8 million for the six months ended June 30, 2020 to RMB1,121.7 million for the six months ended June 30, 2021 resulting from the appreciation in value of the portfolio companies investments in our own private equity funds and third-party private equity funds. The committed capital and AUM of our private equity funds were RMB28.1 billion and RMB61.7 billion as of June 30, 2021, representing an increase of 1.9% and 7.5% from RMB27.5 billion and RMB57.4 billion as of the end of 2020, respectively.

During the six months ended June 30, 2021, the total return of a main fund successfully exceeded the agreed return level in the governing agreement, and it is highly improbable that a significant reversal in the amount of cumulative return will occur. Accordingly, the Group was entitled to a performance-based fee and recognized this fee as income from carried interest. The carried interest to management team and other parties was recognized as an operating expense. The realized income from carried interest decreased by 80.3% from RMB20.9 million for the six months ended June 30, 2020 to RMB4.1 million for the six months ended June 30, 2021.

Segment Operating Expenses

For the investment management segment, segment operating expenses increased by 30.9% from RMB248.9 million for the six months ended June 30, 2020 to RMB325.8 million for the six months ended June 30, 2021. This increase was primarily due to the (i) increase in finance cost related to new bank facilities, (ii) increase in our compensation and benefit expenses, and (iii) investment gains attributable to interest holders of consolidated structured entities.

Segment Operating Profit

For the investment management segment, segment operating profit increased by 152.2% from RMB394.4 million for the six months ended June 30, 2020 to RMB994.8 million for the six months ended June 30, 2021. Segment operating margin improved from 61.3% for the six months ended June 30, 2020 to 75.3% for the six months ended June 30, 2021.

Unrealized Net Carried Interest

Unrealized net carried interest, calculated as unrealized income from carried interest subtracting carried interest to management team and other parties, increased by 55.4% from RMB184.1 million for the six months ended June 30, 2020 to RMB286.0 million for the six months ended June 30, 2021. INTERIM DIVIDENDS

The Board does not recommend the distribution of an interim dividend for the six months ended June 30, 2021.

The Company has adopted a dividend policy (the “**Dividend Policy**”), which aims to increase or maintain the value of dividends per share of the Company, to provide reasonable return in investment of investors, and to allow the Shareholders to assess its dividend payout trend and intention.

Pursuant to the Dividend Policy, a dividend may only be declared and paid out of the profits and reserves of the Company lawfully available for distribution (including share premium), and may not be declared and paid out if this would result in the Company being unable to pay its debts as they fall due in the ordinary course of business. The Board has absolute discretion in whether to pay a dividend and alternatively, Shareholders may by ordinary resolution declare dividends, but no dividend may be declared in excess of the amount recommended by the Board. In addition, the Company does not currently have a fixed dividend payout ratio. Even if the Board decides to pay dividends, the form, frequency and amount of dividends will depend on, among other things, (a) current and future operations, and future business prospects, (b) the Company’s liquidity position, cash flows, general financial condition, capital adequacy ratio and capital requirements, and (c) the availability of dividends received from subsidiaries and associates in light of statutory and regulatory restrictions on the payment of dividends.

During the six months ended June 30, 2021, a final dividend of RMB38 cents per share in respect of the year ended December 31, 2020 was declared to owners of the Company. 3. REVENUE AND SEGMENT INFORMATION (CONTINUED)

Segment revenue and results (continued)

The following is an analysis of the Group's revenue and results by reportable segments: (continued)

Segment profit or loss represents the results of each segment without allocation of corporate items including other income, gains or losses, investment income arising from certain incidental and ancillary investments (the "Passive Investment Income"), share of results of associates, share of results of joint ventures, change in fair value of call option and income tax expense. This is the measure reported to the CODM for the purposes of resource allocation and assessment of segment performance.

Note:

Income from carried interest earned based on the performance of the managed funds ("Carried Interest") is a form of variable consideration in their contracts with customers to provide investment management services. Carried Interest are earned based on fund performance during the period, subject to the achievement of minimum return levels, in accordance with the respective terms set out in each fund's governing agreements. The segment results of investment management include the unrealised income from Carried Interest calculated on an as-if liquidation basis in the segment information as it is a key measure of value creation, a benchmark of the Group's performance and a major factor in the Group's decision making of resource deployment. The revenue adjustments represent the unrealised income from Carried Interest of RMB1,198,249,000 and RMB808,574,000 for the six months ended June 30, 2021 and 2020 respectively, which are based on the underlying fair value change of the respective funds managed by the Group. The associated expense adjustments represent the unrealised carried interest payable to fund management team and other third parties of RMB912,256,000 and RMB624,481,000 for the six months ended June 30, 2021 and 2020 respectively. The unrealised income from Carried Interest is allocated to the general partners based on the cumulative fund performance to date, subject to the achievement of minimum return levels to limited partners on an as-if liquidation basis. At the end of each reporting period, the general partners calculate the income from Carried Interest that would be due to the general partners for each fund, pursuant to the fund agreements, as if the fair value of the underlying investments were realised as of such date, irrespective of whether such amounts have been realised.

As the fair value of underlying investments varies among reporting periods, it is necessary to make adjustments to amounts presented as income from Carried Interest to reflect either (a) positive performance in the period resulting in an increase in the Carried Interest allocated to the general partners or (b) negative performance in the period that would cause the amounts due to the general partners to be less than the amounts previously presented as revenue, resulting in a negative adjustment to the Carried Interest allocated to the general partners. The carried interest payable to fund management teams and other parties is included, on a basis consistent with such income from Carried Interest, as an expense in the investment management segment.

However, for the six months ended June 30, 2021 and 2020, except for RMB4,124,000 and RMB20,931,000, respectively, of Carried Interest realised for certain fund, no income from Carried Interest for other funds was recognised as revenue and it will not be recognised until (a) it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur, or (b) the uncertainty associated with the variable consideration is subsequently resolved. All allocations of Carried Interest as an expense are recognised only when the amounts that will eventually be paid out can be reliably measured, which is generally at the later stage of the applicable commitment period when the amounts are contractually payable, or "crystallised".

Note b: Sales and repurchase agreements are transactions in which the Group sells a security and simultaneously agrees to repurchase it (or an asset that is substantially the same) at the agreed date and price. The repurchase prices are fixed and the Group is still exposed to substantially all the credit risks, market risks and rewards of those securities transferred. These securities are not derecognized from the consolidated financial statements but regarded as "collateral" for the liabilities because the Group retains substantially all the risks and rewards of these securities.

The proceeds from selling such securities in the Stock Exchanges are presented as financial assets sold under repurchase agreements. Since the Group transfers contractual rights to receive the cash flows of the securities, it does not have the ability to sell or repledge these transferred securities during the term of these arrangements. Financial assets sold under repurchase agreements bear effective interest at 1.48% to 6.35% (December 31, 2020: 2.98% to 4.10%) per annum.

The following tables provide a summary of carrying amounts and fair values related to the transferred financial assets that are not derecognized in their entirety and the associated liabilities:
